

The StoryHealing Circle

Story as medicine. Voice as identity.

For festivals, summits, retreats and companies. In English or French, from intimate groups of 10 to rooms of 150+.

THE EXPERIENCE

Carried by a cinematic background score, participants lie down, breathe, and are guided through a story they have never said out loud.

We do not perform it. We do not fix it. We let it arrive, and we rewrite the meaning it carries. The session closes with a mirror practice: each person meets the one who carried it all.

Soft activation, deep landing, no sharing required. The emotional altitude is designed to fit the session's place in your program.

Participants walk away with a story they had never said out loud, and a new meaning for it.

THE JOURNEY

1 · The event

What happened in your life.

2 · The meaning

What you made it mean about you.

3 · The identity

Who you became because of it.

→ The rewrite

A new meaning, landed in the body.
